
(a) Cutoff Dimension $\langle d \rangle$
Data ($\langle d \rangle \leq 1.02$)
$\tau^*(\mathrm{K}) = 3.12 \cdot \mathrm{K}^{-0.22}$ ($\mathrm{R}^2 = 0.987$)
K
$\tau\,[\mathrm{fm}/c]$
$\langle d \rangle$
(b) Participation Ratio $\langle d_{\mathrm{PR}} \rangle$
Fitted 1D Boundary
K
$\tau\,[\mathrm{fm}/c]$
$\langle d_{\mathrm{PR}} \rangle$
